CITY OF

BOSTON.

SEVENTH ANNUAL REPORT

OF THE

BOARD OF FIRE COMMISSIONERS,

FOR THE

YEAR ENDING APRIL 30, 1880.

OFFICE OF THE BOARD OF FIRE COMMISSIONERS,

CITY HALL, BOSTON, May, 1880.

To His Honor the Mayor and the City Council of the City of Boston:—

GENTLEMEN,—The Board of Fire Commissioners herewith presents its Seventh Annual Report, containing, in accordance with the provisions of the city ordinance, a consolidated statement of the facts contained in the monthly reports of the Board for the last year; a list of the causes of fire, alphabetically arranged; a statement of the income and expenditures on account of the department during the year; a schedule of all the property belonging to the department, with a statement of its condition on the date of this report, and an estimate of its value; the number of hydrants in the various sections of the city, and the location and capacity of each fire reservoir; the number and location of the fire-alarm boxes, and the apparatus which respond on a first, second, and third alarm from each box, together with such information or suggestions as the Board deems proper to communicate.

Since the last report two changes have occurred in the membership of this Board; the term for which Commissioner Chas. H. Allen was appointed having expired on the first Monday in May, 1879, John E. Fitzgerald was nominated

and confirmed as Commissioner for three years from the above date.

After a painful illness, David Chamberlin, then Chairman of the Board, died at North Adams, on the 4th of September, 1879. During his connection with this department, covering a period of thirty-seven years, he discharged the duties of the various positions which he filled with an exactitude rarely found in public officials. As a member of this Board it was truly said of him that he labored for the city and guarded its interests with the same degree of carefulness which he bestowed on his own affairs.

By his death this department lost one of its most useful members, and the city a faithful public servant and upright citizen.

The vacancy in this Board, caused by his death, was filled on the ninth day of October, 1879, by the confirmation of Commissioner Edward A. White, whose term will expire on the first Monday in May, 1881.

Commissioner Henry W. Longley's term having expired on the first Monday in May this year, he has been renominated and confirmed for the ensuing three years.

ORGANIZATION.

The number of men in the department does not materially differ from that given in former reports : —

Permanent men	249
Call men	333
Engineers	14
Fire-alarm branch	11
Clerks	3
Commissioners	3
Total	613

The number on the permanent force has been increased by three.

HOUSES.

The houses of the department are in good condition, and will compare favorably with those of similar departments throughout the country. In the houses of the call companies it was usual for the members to assemble on the floor, no sitting-rooms having been provided for them. Within a few months a room in each house has been fitted up for the use of the call members, where they are obliged to assemble once a week, between the hours of seven and nine o'clock, P.M., to read the rules and general orders of the Board.

In many of these rooms the members, at their own expense, have placed billiard-tables, by permission of the Board. The change from the floor system has proved beneficial. It has made the floors of our call houses quiet, orderly, and as free from smoke as those of the houses of the permanent companies. It attracts nightly a larger number of our call men than heretofore visited the houses, and makes their services more effective in case of fire.

This board has for some time felt the necessity of utilizing the "Scott-Uda Aerial Ladder" in a quicker space of time than heretofore. It has been the practice to send for it from the scene of the fire, if it were needed, and much valuable time was lost thereby. As this ladder is the only one which can reach the roofs of high buildings, being one hundred feet long, and as the time may come when it might be necessary to have it first on the scene, especially in case of fire in our large hotels and model buildings, the Board has equipped it, taken it from the house of Engine Company 25, refitted old Engine 3 house, on Washington street, near Dover, and there located it, and ordered that it respond to first alarms from boxes in the vicinity of our high hotels and buildings. The change will only involve the employment of a permanent driver and the maintenance of a pair of horses.

In accordance with the recommendation of this Board, the City Council has appropriated the sum of \$6,000 for the establishment of a call hook and ladder company in the Highland District. A contract has already been entered into for building a truck for the new company, and, when finished and equipped, it will be located in the house now occupied by Hose Company No. 7, on Tremont street, near Cabot street. This company, when established, will supply a want long felt in that section of the city. It will respond to alarms of fire from the Tremont-street section of the Highlands and the Back Bay. This latter part of the city will in a few years be filled with costly residences, and will require additional protection from fire. In the judgment of this Board it would be wise economy to buy a lot in the vicinity of the Prince School, to be utilized at no distant day for a chemical or steam fire-engine company's house.

APPARATUS.

The condition of the several pieces of apparatus is good. The boilers of the engines that are getting old are being replaced with new ones from time to time.

No new apparatus has been purchased during the year,

with the exception of a Concord wagon, for the use of the chief engineer; but on several pieces of apparatus extensive repairs have been made at the repair shop, rendering them as good as new. Among those thus repaired are:—

Engines one, eight, nine, ten, twelve, fourteen, fifteen, sixteen, nineteen, twenty, twenty-one, twenty-six, twenty-seven, and twenty-nine.

Hose carriages five, six, nine, and twelve.

Chemical engines four and seven.

Hook and ladders one, seven, eight.

Two new hose carriages have been built at the repair shop, as also a sleigh for the use of the Commissioners.

THE APPARATUS REPAIR SHOP.

The establishment of this shop in connection with the Fire Department has proved a great success. The work of the department is there done in the shortest space of time, and at cost prices. Ten men are permanently employed, together with detailed men from the department when additional help is required.

The Board of Fire Commissioners begs to call the attention of the City Council to the unsuitable condition of the repair shop for the work of this department. The shop is too small for the work required, and is an unsuitable building in which to do the painting of the apparatus.

The hose and harness shop is also situated in another building, and it would be a great advantage if both shops were under one roof.

The cost of maintaining the repair shop is	.	\$9,423 32
Less old material exchanged for new	. . .	606 09
Total	<u>\$8,817 23</u>

Distributed as follows:—

Repair of apparatus	\$5,752 24
Fire-alarm telegraph, and bells and clocks	. . .	883 66
Engine-houses, hose and harness shop	. . .	1,558 95
Tools, and small supplies, hydrants and reservoirs	. . .	622 38
		<u>\$8,817 23</u>

THE HOSE AND HARNESS SHOP,

situated in house of Engine 25, on Fort Hill square, is used for the making and repairing of harness and the repair

of hose. In it are employed one permanent harness-maker, and others detailed from the department. Since the last report the Commissioners have entered into an agreement with the patentee of the Speddy swinging-harness to use it in this department. It is estimated that it will save from 30 to 50 per cent. in the wear and tear of harness, while it will obviate the necessity of keeping the horses of the department continuously harnessed, as is the case now.

The cost of maintenance in repairing hose	.	.	\$655 36
Less old material exchanged for new	.	.	98 40
			<hr/>
			\$556 96
Making and repairing harnesses	.	.	1,340 72
			<hr/>
Total	.	.	\$1,897 68

HOSE.

The condition of the hose in this department is good. During the recent fires on Federal and Albany streets a large part of the hose in the department was brought into requisition and stood the test well, few pieces bursting. The Board deemed it expedient to increase the amount of hose now in the department, and asked for a larger appropriation than usual this year (\$10,000) for that purpose, which the City Council granted. This will enable the Board to increase the amount of hose in use 10,000 feet or more. During the present year 7,329 feet of hose have been purchased, and 5,921 condemned.

The amount now in use is as follows:—

Rubber	14,447 feet.
Cotton	31,349 “
Leather	16,117 “
Chemical	3,706 “
Hand	2,737 “
Suction	790 “

HORSES.

The number of horses in the department is 137, and with few exceptions they are in good condition. A hospital for sick horses has been established by the Board in Hose No. 7's house, where they are attended by George F. Stimson, a member of the department, who is an excellent veterinary surgeon, and to whom, under the Chief, is confided the inspection and care of the horses of the department. During the

year 4 horses have died, 18 have been exchanged, and 22 have been purchased.

WATER AND HYDRANTS.

The city is at present well supplied with hydrants and reservoirs to furnish water in case of fire. The Water Board furnishes the necessary facilities whenever requested. During the past year additional hydrants have been added, viz.: Lowry 21, Post 32, Boston 28, and Boston Y 24, making a total of hydrants for supplying water in case of fire 4,311. In addition to this protection, the city has 216 fire reservoirs, capable of holding from 300 to 500 hogsheads of water.

The Board of Fire Commissioners begs to call the attention of the City Council to the large tax which this department pays for the use of water at fires, altogether out of proportion to the cost of the article used.

If this department were to pay what private individuals are taxed for the use of water, viz., 2 cents per one hundred gallons, the cost for water used in extinguishing fires during the year would not exceed \$3,000, and yet under the ordinance which allows a water-tax of \$18 for each hydrant, the sum of \$77,364 was paid for the use of water this year, in addition to \$12 for the maintenance and care of each hydrant, making a sum total \$128,940 paid by this department for the water account, — an amount which must necessarily increase each year in proportion to the number of hydrants.

This tax has increased from \$59,730 in 1871-72, to \$128,940 in 1879-80. The Commissioners are aware that the answer to the above statement is, that the Fire Department water-tax enables the Water Department to charge lower rates to household consumers. This it seems to us is no argument in favor of continuing this tax and charging it to the expenses of the Fire Department, though it might have weight if used as an argument in favor of charging in the general appropriation a certain amount for the Water Department to be raised by general taxation on all property, and thus lessen somewhat the water-rates of householders. The Commissioners ask whether the time has not come to revise the rates fixed in the ordinance for the use of water and the maintenance and care of hydrants.

FIRE-ALARM TELEGRAPH.

Since the last report a change has taken place in the office of Superintendent. The Commissioners deemed it expedient

to discharge John F. Kennard, who held that position for many years, and appoint in his place Captain Brown S. Flanders.

Capt. Flanders is a thorough mechanic, an able and zealous officer; has been connected with the Fire Department for many years, and under his supervision the fire-alarm telegraph department will be carefully watched. The expenses of this department during the ensuing year will be necessarily large as compared with former years. The wires on many of the circuits will have to be replaced by new wires, and their location changed, to prevent their coming in contact with the numerous telegraph and telephone wires that have been laid in the past few years. The constantly increasing numbers of these wires are seriously interfering with the workings of our fire-alarm telegraph, and the utmost care on the part of the fire-alarm department cannot prevent it.

The remedy is rendered still more difficult when trouble occurs at night, for then the buildings and dwelling-houses upon which our wires rest are closed.

If the wires of the fire-alarm telegraph were run on poles in the business portion of the city, and such poles were used solely for fire-alarm purposes, the difficulties which now beset it would in a great measure be removed. By a recent Act of the Legislature the City Council of any city may permit telegraph and telephone wires to be laid under any public way or square. Telephonic science has not as yet arrived at such perfection as to permit the adoption of the foregoing method; but the fire-alarm wires can be so laid, and with the multiplicity of other wires the Commissioners think the time has arrived when either the pole system, or the underground plan, must be adopted in the central portion of the city, to protect our fire-alarm.

As a temporary expedient the Board is at present trying insulated wire to be run from the central office through that portion of the city where telegraph and telephone wires are very numerous. A new eighteen-pen register will soon be substituted for that which has been in use for many years, and which had only ten pens with fourteen circuits connected with it.

Hereafter each circuit will have an independent pen, and thus will be avoided the danger of two alarms coming simultaneously from different circuits and registering on one pen. Connected with the fire-alarm office are fifty public bells, weighing from 2,000 to 4,000 lbs., besides 96 gongs, 57 tappers, 23 vibrators, in the various houses of the department, and a powerful whistle on the Brighton abbattoir, all

of which sound each alarm of fire. Complaint is made, that sometimes one or more of the bells fails to strike the alarm correctly; but, with the utmost care, failures of this kind will occur. The position of these large bells, the delicacy of the machinery connected with them, and its exposure to dust and atmospheric changes, make failures of this kind possible, although everything else may be in thorough working order. Boston is the only city which rings these bells to such an extent; if there were no call companies in the department this Board would have no hesitation in ordering the discontinuance of such ringing. The advantage to be obtained from such a change would be, first, it would render more certain the working of the fire-alarm apparatus in case of an alarm; it would do away with the crowd of idle spectators who now gather at fires, some for no honest purpose, and would thus enable the members of the department to work more efficiently and expeditiously. The alarm could be more quickly struck on the gongs and tappers in the houses of the department, and time would be thus saved; instead of one blow *each* $3\frac{3}{4}$ seconds, *one* blow in every second could be struck. Connected with the fire-alarm office are 277 fire-alarm boxes located in different sections of the city, which are increased from time to time as they are needed.

FIRES.

The loss by fire during the past year was the largest in the aggregate since the formation of the Board of Fire Commissioners; but, with the exception of the fire on the 28th of December last, was the smallest, with one exception, for 25 years.

The losses and insurance are as follows:—

	Loss.	Insurance.
On buildings . . .	\$375,754 00	\$2,381,898 00
On contents . . .	874,736 00	2,220,693 00
	<hr/>	<hr/>
Total . . .	\$1,250,490 00	\$4,602,591 00
Less loss Federal-street fire,	905,393 00	
	<hr/>	
	\$345,097 00	

The loss by the fire in building Nos. 91 and 93 Federal street, on the night of December 28th and 29th, amounted to \$905,393.00.

The fire occurred on Sunday evening, and must have been burning some time before its discovery. The first alarm was rung in at 10.58 P.M., and was quickly followed by a second. A third was ordered by the Chief Engineer; but

telegraph wires had, in the mean time, fallen on the wires of the fire-alarm telegraph, cutting off all communication with the central office. When this fact was discovered, a messenger was despatched to the City Hall, and a general alarm ordered. The delay in giving the alarm, occasioned by this accident, was a serious detriment to the department in arresting the progress of the fire. The building contained inflammable material, and, all efforts to save it proving unavailing, the department turned its attention to preserving the adjoining buildings. The buildings on either side of the "Miller" building, on Federal street, — one of which was literally packed through all its stories with wool or cotton, — escaped with little damage; but the buildings situated on the rear of the "Miller" building, viz., the "Hunnewell" building and the "Cathedral" building, fronting on Devonshire street, were consumed by the fire, the former partially, and the latter wholly. The "Miller" building, on Federal street, and the "Hunnewell" building, on Devonshire street, are on a direct line, and the same party-wall extended from their northerly and southerly boundary; they are separated on the rear by a narrow area twenty feet wide, for the admission of light and air, and form the easterly and westerly side of said area. Overlooking this area were forty-two (42) windows on the "Hunnewell" building, and as large a number on the "Miller" building, all supposed to be protected by iron shutters. The "Cathedral" building, on Devonshire street, is situated north of the "Hunnewell" building, and separated from it by a narrow passage-way, which formed the rear entrance to the "Miller" building. The southerly party-wall of the "Cathedral" building was, for a distance of about forty (40) feet, also the party-wall of the "Miller" building, and for a distance of twenty (20) feet formed the northerly boundary of the area above mentioned. Overlooking this area, also, was a window in each story of the "Cathedral" building, and protected by iron shutters. In the party-wall separating the "Miller" and "Cathedral" buildings was an opening connecting the fifth stories of these buildings, and protected by iron doors.

On the rear of the "Cathedral" building was also a stair-way connecting it with the "Miller" building.

The members of the department tried in vain to arrest the progress of the flames from the "Miller" building across the area referred to; an explosion threw open the iron shutters on the "Miller" building, projected the flames into the narrow and high area, converted it into a blow-pipe, and warped or blew off the shutters on the windows of the "Hunnewell" and "Cathedral" buildings. The men at work on the "Hunne-

well" building state that the fire communicated with this building simultaneously through all its stories, and in the "Cathedral" building first appeared in the second and third stories, near the windows on the area, and in the fifth story came through the door-way in the party-wall, and thence through all the building. The men were obliged to retreat and fight the fire from the street. The "Cathedral" building was soon unroofed by a loud explosion, and became a mass of flames; the rear wall of the "Miller" building, built on iron piers, with granite pillars for foundations, with cast-iron centres, and six (6) stories high, fell to the ground, and the whole building was destroyed.

In the opinion of the Board of Fire Commissioners the causes of the spread of the fire were: the great headway which the fire attained before its discovery; the delay occasioned in sounding the third and general alarms, from the causes before mentioned; the explosions before mentioned; the warping and blowing off of the iron shutters protecting the windows of the several buildings overlooking the area, and the close proximity of these windows to each other, rendering communication by fire as easy as if all the buildings were one.

While some insurance companies are to be found who will take risks, no matter how dangerous buildings may be; while property owners barely comply with the "Building Laws," and try to evade them all they can,—let them, in the midst of the business portions of the city, for employments in which dangerous materials are more or less used, or highly combustible goods—wool, cotton, oils, etc.—are stored from the first to the sixth stories; while this property is often left to take care of itself without proper watchmen, as was the case, we are informed, in the "Miller" building,—large fires are liable to occur at any moment, no matter how efficient a Fire or Inspection of Buildings Department may be.

This fire, as also the late fire on Broadway, New York, in which two gallant firemen lost their lives, have again taught the lesson which the great fire of '72 suggested, viz.: the unreliability of granite or iron pillars as supporters of walls in cases of fire. When subjected to intense heat, granite crumbles into sand, and iron fractures, melts, and becomes worthless. This fire has also shown that the shutter which best withstands intense heat is that which is tin lined.

Below is given a statistical account of the number of alarms for each day in the week during the past four years, the number from 6 P. M. to 6 A. M. each day, with the loss during that time of the day for the whole year, etc.

TABLE NO. 1.

	6 P.M. to 6 A.M.	31	22	20	25	26	27	19	22	22	23	27	28	292

From the above tables it will be seen that nearly 90 per cent. of the losses by fire occur at night. These losses are principally confined to the business section of the city, and suggest the necessity of private watchmen, who should be employed in all our large warehouses to visit at stated times in the night all parts of the building. The expense would be small compared with the immense amount of capital saved, and which now yearly goes out of existence because of a neglect of this precaution. The tax which the people of this city and State pay in the shape of loss of property as a penalty for careless construction and lack of precaution is very large. The premiums paid yearly in this State on fire risks will reach \$5,000,000; and if to this be added the cost of Fire Departments, an idea can be formed of how much money is annually paid by our citizens in this direction. It is safe to say that property to the amount of \$4,000,000 goes out of existence each year in this State alone, — a wiping out to that extent of the accumulated earnings of our people. On this subject we cannot do better than quote from the admirable report of Mr. Edward Atkinson to "The Boston Manufacturers' Mutual Fire Insurance Co.," which should be read by all interested in fire insurance matters:—

"The heaviest single tax now imposed upon this nation is the fire tax.

"The owners of property adopt unsafe methods of building without much consideration, because they are apparently cheapest, and rely upon policies of insurance in companies that have been licensed by the State.

"The art of combustible construction has adequately accomplished its apparent object.

" During the five years ending Jan. 1, 1879, the losses by fire in the United States and Canada, aggregate	\$412,759,935
"The cost of sustaining Insurance Companies during the same period has been at least	150,000,000
"Cost of Fire Departments not less than \$25,000,000 per year	125,000,000
"Total	<u>\$687,759,935</u>

"Average per year, \$137,500,000."

The above figures are highly suggestive, both to underwriters and to the insured as well. Carelessness among the latter in construction and storage, and recklessness among

the former in the acceptance of risks, bring disaster and bankruptcy to both. It is often said that the business of fire underwriters is not to prevent fires, or aid in the observance of the building laws, but to charge a higher rate for premiums in proportion to the risk run. This principle, if carried out, would make the business of underwriting a mere betting speculation, and an unprofitable one indeed for the insurer and the insured — more disastrous than it has been heretofore. Of the one hundred and ninety-nine fire insurance companies chartered by the Massachusetts Legislature during the century only seventy-two survive. We are convinced that the insurance companies doing business in this city can do more to remedy defective construction, and prevent large fires, than the most stringent building act which the Legislature can pass.

The saddest calamity in connection with the fire record of last year was that which occurred on the night of the 17th of September, in the three-story wooden tenement, No. 128 Gold street, South Boston, occupied by four families. The families had retired for the night. The fire originated in an ash-barrel in the cellar, under the stairway, and worked its way to the second story, completely burning away the stairs. Some of the tenants were suffocated in their rooms, while others tried to escape through the roof. The alarm was sounded at 11.50 P.M., and within three minutes from the first stroke Truck 5 was on hand, the other apparatus following. Those who remained on the roof were saved by the firemen; one person jumped from it and was killed. The house was only partially destroyed, and the loss on the same was small; but seven persons were suffocated or burnt. The building was only 37 feet high. This calamity suggests a lesson in connection with fires of this kind, which, if remembered and put in practice, may be the means of averting such a loss as this mentioned. When fires occur in dwelling-houses, and it is found impossible to escape by the stairway or to the roof, the doors of the rooms in which the inmates may be should be closed and the windows opened to admit pure air. An ordinary door will resist fire for more than five minutes, and will keep smoke and hot air out of the room, thus preventing suffocation. In the thickly settled localities of the city the apparatus of the department is always on hand within three minutes after the first stroke of the alarm. Jumping from windows and roofs of buildings should be avoided. It adds only to the danger it intends to relieve. In nearly every instance persons who have been killed or maimed by jumping from windows would have been saved if the above directions were followed, and patience exercised

until the arrival of the Fire Department. Persons should remain at the open windows as long as possible. To add to the facilities for saving life the Board has ordered "12 jumpers" of strong canvas, to be used when needed. Improvements have been made in apparatus to save property from fire, but human beings are supposed to be able to take care of themselves. The theory is, that life is more precious and above all property; but we venture to say that the loss on the Federal-street fire will be written about and remembered when the holocaust on Gold street is forgotten.

All dwelling-houses should have a scuttle in the roof, and a ladder leading to it.

Below is given the losses and insurance on property, with the number of fire alarms, for the past fifty years:—

Recapitulation of the Number of Alarms of Fire, and the Losses and Insurance on the same, from

	Alarms.	Losses.	Insurance.	Population.
Sept. 1, 1829, to Aug. 31, 1830	110	\$118,540	\$52,750	61,392
“ 1830, “ 1831	62	23,620	4,320	
“ 1831, “ 1832	89	68,195	40,975	
“ 1832, “ 1833	159	74,613	25,713

PENSIONING DISABLED AND AGED FIREMEN.

The Legislature at its last session passed an act pensioning members of the Fire Department of this city, which explains itself, and which we give below.

[CH. 107.]

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:—

SECTION 1. The board of fire commissioners of the city of Boston, by the affirmative vote of all the members, and with the approval of the mayor, may retire from office in the fire department any permanent or call member thereof, who has become disabled while in the actual performance of duty, or any permanent member who has performed faithful service in the department for a period of not less than fifteen consecutive years, and place the member so retired upon a pension roll. No such member shall be placed on the pension roll unless it shall be certified to the board in writing, by the city physician, that such member is permanently incapacitated, either mentally or physically, from performing his duty as a member of the department. In case of total permanent disability caused in or induced by the actual performance of his duty, the amount of annual pension shall be one-half of the annual compensation allowed to the permanent men of the grade in which said member served, or such less sum as the said board may determine. The pension of members of the permanent force who have served fifteen or more consecutive years shall be an amount not exceeding one-third the annual salary or compensation of the office from which said members are retired, or such less sum as the board may determine.

SECT. 2. If any member of the said fire department shall die from injuries received while in the discharge of his duties and shall leave a widow, or, if no widow, any child or children under the age of sixteen years, a sum not exceeding three hundred dollars may be paid by way of annuity to such widow so long as she remains unmarried, or to any such child or children so long as he or they continue under the age of sixteen years, and the board of fire commissioners may from time to time order such annuity to be reduced.

SECT. 3. For the purpose of carrying out the provisions of the foregoing sections, the board of fire commissioners may, with the approval of the mayor, expend such sums as may be specially appropriated therefor by the city council, for the relief of widows or children of members of the fire department who have been killed in the execution of their duty, or have died from the effect of injuries received in the execution of their duty. For the payment of the pensions hereinbefore authorized, the board of fire commissioners may draw, from time to time, upon the city treasurer of Boston, any sums which may be specially appropriated therefor by the city council.

SECT. 4. The mayor of the city of Boston for the time being (and his successors in office), the board of fire commissioners of the city of Boston for the time being (and their successors in office), shall together continue a body corporate for the purposes of receiving and holding all sums of money, and real and personal estate not exceeding in the aggregate two hundred thousand dollars, which may be given, granted, bequeathed, or devised to it for the benefit of members of the Boston Fire Department, or their families requiring assistance, or for the benefit of any persons, or the families of any persons, who have been such members requiring assistance. The property so held shall be known as The Boston Firemen's Relief Fund. The said body corporate shall have

authority to manage and dispose of the same and the income thereof, according to their best discretion, subject to the provisions of any and all trusts which may be created for the purposes aforesaid. Such corporation shall have all the powers and privileges, and be subject to all the duties, restrictions, and liabilities set forth in all general laws which now are or may hereafter be in force relating to similar corporations.

SECT. 5. This act shall take effect upon its passage.

[*Approved March 17, 1880.*]

The Commissioners call the attention of the City Council to the necessity of making an appropriation to carry out the intent of the above act, as there are now in the service of the department at least six of its members who come under its provisions.

The last sections of the act make the Mayor for the time being, and the Fire Commissioners for the time being, a corporation to receive moneys, etc., in trust, to help firemen of the city of Boston, or their families. This corporation has organized, and has already received from the chief engineer, as chairman of the committee of the Firemen's Ball, lately held, the sum of nine thousand dollars in trust, to be used for the benefit of sick and disabled firemen. As this ball is to be of annual occurrence, it is to be hoped a large fund will be accumulated in a few years, the income from which will be sufficient to aid our temporarily sick and disabled firemen.

THE POLICE DEPARTMENT

is an excellent auxiliary, in case of fire. By order of the Police Commissioners, a certain number respond to first, second, third, and general alarms of fire, and are invaluable in keeping the streets clear in the vicinity of fires, thus enabling the Fire Department to do effective work.

THE PROTECTIVE DEPARTMENT,

though not part of the Fire Department force, is of inestimable value as part of the working force at fires, and saves much valuable property from destruction by fire and water. This force is paid by the Insurance Companies doing business in the city.

JOHN E. FITZGERALD, }
HENRY W. LONGLEY, } *Fire Commissioners.*
EDWARD A. WHITE, }

APPENDIX.

APPENDIX A.

BOARD OF FIRE COMMISSIONERS.

One member is appointed annually in April, for a term of three years from the first Monday in May following. The nomination is made by the Mayor, subject to confirmation by the City Council.

JOHN E. FITZGERALD, *Chairman*, for three years from May, 1879. Term expires May, 1882.

HENRY W. LONGLEY, for three years, from May, 1880. Term expires May, 1883.

EDWARD A. WHITE, for unexpired term of David Chamberlain, deceased. Term expires May, 1881.

Salaries, \$3,000 each.

Frederick W. Smith, Jr., *Clerk*. Appointed by the Fire Commissioners.

FIRE DISTRICTS.

The city is divided into Ten Fire Districts, as follows:—

DISTRICT 1. — Comprises all that part of Boston known as East Boston.

DISTRICT 2. — All that part of Boston formerly known as Charlestown.

DISTRICT 3. — All that part east of a line beginning at the Charles-river drawbridge, and running through the centre of Charlestown street, Haymarket square, and Washington to Summer street, and north of Summer street and the N.Y. and N.E. R.R. passenger depot to the water.

DISTRICT 4. — All that part west of District 3, and north of a line running through the centre of Winter and Park streets, and west of Beacon, to Otter and north of Otter street to the water.

DISTRICT 5. — All that part south of Districts 3 and 4 to the centre of Dover-street drawbridge, and a line running through the centre of Dover, Berkeley, Boylston, Arlington, Beacon, and Otter streets to the water.

DISTRICT 6. — All that part of Boston known as South Boston.

DISTRICT 7. — All that part of Boston south of District 5, to the centre of Albany-street drawbridge; thence through the centre of Albany, Northampton street, Columbus avenue, and Chester park, to Charles river.

DISTRICT 8. — All that part south and west of District 7, to the boundary line of West Roxbury, and West of Washington street to the Brookline boundary line, and including all of Ward 25, formerly Brighton.

DISTRICT 9. — All that part south of District 6 and 7, to West Roxbury line, running through the centre of Blue Hill avenue, Columbia, Green, Bowdoin, Church, and Commercial streets, to Dorchester avenue, thence due east to the water.

DISTRICT 10. — All the southerly part of Boston south of Districts 8 and 9, including West Roxbury.

ASSIGNMENT OF DISTRICTS.

Each district is placed under the charge of an Assistant Engineer, as follows: —

District.	Engineer in Command.	COMPANIES IN DISTRICT.			
		Engines.	Chem. Engines.	Hook and Ladder.	Hose.
1	Joseph Dunbar	5, *9, 11	. . .	2	6

PUNGS.

There are 40 pungs in use by the department, — 36 for carrying hose, and 2 for jobbing, and 2 for Fire-Alarm Department.

The ENGINES, HOSE, HATS, AXES, LADDERS, and all the other apparatus used by the Fire Department, are owned by the city, and are under the care and control of the Board of Fire Commissioners.

COAL HOUSES.

No. 1 is located on Salem street. This house is in good repair, and supplies for the north and west sections of the city are taken from it in case of a large fire.

No. 2 is located on Washington street, near Dover street.

No. 3 is located on Orleans street, East Boston. From this house, in case of fire, supplies are taken for the East Boston Department.

SUPPLY WAGONS.

No. 1. Kept at Engine-house No. 26, Mason street; used as a coal wagon.

No. 2. Kept at house of H. & L. Co. No. 3 Harrison avenue, corner of Bristol street.

No. 3. In reserve. Kept at house of Engine Co. No. 22, Dartmouth street; used as a coal wagon.

No. 4. Concord wagon at Hose-house No. 3.

SPARE APPARATUS.

One hose carriage at the Apparatus Repair Shop, on Harrison avenue, with 300 feet of hose.

One hose carriage with 400 feet of $2\frac{1}{2}$ -inch hose, in building on Nawn street, owned by Owen Nawn.

One hose carriage, with 650 feet of $2\frac{1}{2}$ -inch hose, Engine-house No. 25, Fort Hill square; to be used in cases of large fires.

Deer Island. One hand engine, with two hose carriages and 700 feet of rubber and cotton hose, belonging to the Fire Department and stored here, to be used by the convicts, if required.

At each of the above places are the needful wrenches, goosenecks, and pipes to be used with the hose.

Steam Fire Engines, known as Relief A, B, and C, and one formerly known as No. 2.

Hose carriages, known as Relief A, B, C, and D.

HYDRANTS.

During the year 105 Hydrants have been established and 32 abandoned, as follows : —

 Hose No. 6.
 DAMAGE to building, totally destroyed.
 CONFINED to building.
 REMARKS. — The fire was discovered by those in the building about
 6.30 P.M.; but owing to a misunderstanding of orders between the
 Dis't Eng'r and the parties holding keys to the signal box No.
 178 no alarm was sounded until 8.31 P.M. Owing to the building
 being a great distance from a hydrant, about 3,000 feet, and the con-
 sequent scarcity of water, there being none in the immediate vicini-
 ty, it is very doubtful if the building could have been saved had the
 alarm been promptly sounded.

WEDNESDAY. SEAVERNS AVE. Two and one-half stories high; size, 35 × 40.

APPENDIX B.

FIRE-ALARM TELEGRAPH.

The Ordinance to establish a Fire Department, passed in October, 1873, placed the Fire-Alarm Telegraph and the public bells and clocks under the charge of the Board of Fire Commissioners. The force employed is as follows : —

Superintendent.

Brown S. Flanders.

Assistant Superintendent.

Cyrus A. George.

Operators.

Charles M. Chaplin, Granville S. Mendell,
Uzziel Putnam.
James L. Crowley, *Assistant Operator and Battery-man.*

Foreman of Construction.

Wm. H. Godfrey.

Repairers.

George S. Thom, Jonathan M. Morris,
Wm. B. Green, Joseph W. Bird,
Dennis O'Neil.

A constant watch is kept at the head-quarters, City Hall, night and day, by the operators. Each operator has assigned to him certain hours of duty, during which time he is responsible for the correct working of the apparatus in giving alarms, and all testing of the circuits and other details pertaining to the service. An automatic arrangement is connected with the receiving apparatus, by which assistance may be called from the sleeping apartments, if at any time the operator should be suddenly incapacitated by illness from performing his duties. No operator is permitted to sleep during his watch, unless expressly relieved by some one else, and by consent of the Superintendent.

Each operator is accountable to the Superintendent for any mistakes that may occur at the office during his hours of duty.

An accurate account is kept of the time of giving each alarm, and of the station from which it originates, and all other necessary information.

The wires to East Boston pass through Chelsea, and a box and gong have been placed in the City Marshal's office of Chelsea, and connected with them, in order that aid may be promptly summoned, by either city, in case of need.

The following notice is printed with the numbers of the boxes and circulated among the citizens, for the purpose of instructing them as to the manner of giving alarms and cautioning holders of signal keys in regard to the use of such keys.

The fact that an alarm-box is located near their residence, and where the key is kept, should be known to all persons, both male and female, and the simple manner of giving an alarm in case of fire should be a matter of common education. The Board of Fire Commissioners recommend to all persons who may see this notice, that they make the necessary inquiries to enable them, in case of need, either to get the key and give the alarm, or direct others to do so. *Time* saved in this way may sometimes prevent a conflagration.

In case of fire, follow these

DIRECTIONS.

Get the key to the nearest box to the fire.

Open the box — pull the hook all the way down once, and let go.

Wait *one full minute* for the sound of the bells.

If you hear no sound *pull again*, and a *third* time if you get no sound.

If you fail the third time, go to the next nearest box and do the same there; but do not touch any other box if the nearest one gives the alarm.

After giving the alarm, remain a while, if *possible*, by the box, so as to direct the firemen to the fire.

CAUTIONS TO PERSONS HOLDING SIGNAL KEYS.

1. Never open the box or touch the apparatus except in case of fire.

2. Never sound the alarm for fire seen at a distance.

3. Be reasonably sure that there is a fire before sounding the alarm.

4. Be sure your box is locked before leaving it.

5. Never let the key go out of your possession, except to some responsible person to give an alarm of fire, and be sure the key is returned.

6. If you remove from your house or place of business, return the key to the Fire-Alarm Office without delay.

REGULATIONS CONCERNING FIRE-ALARMS.

First Alarm to be given by striking three or more rounds.

Second Alarm to be given on all the circuits by striking ten blows, followed by the box number.

Third Alarm to be given on all the circuits by striking ten blows three times, thus : 10-10-10.

General Alarms to be given on all the circuits by striking twelve blows three times, thus : 12-12-12.

In cases where Hook and Ladder Companies *only* are wanted, signal to be given by striking ten blows once, with the No. of the Company struck twice, thus : H. & L. No. 1, 10-1-1 ; H. & L. No. 2, 10-2-2, etc.

If more than one Hook & Ladder Company, the signal will be given thus : H. & L. Nos. 1 and 3, 10-1-1-3-3 ; H. & L. Nos. 2 and 4, 10-2-2-4-4, etc.

In case of second and third alarms the "tappers" in all the houses of the apparatus will be struck 2-2 twice when *fire is out*. The order for this signal to be given by the officer in command, at the earliest practicable moment.

Return Signal.—Notice will be given on the bells and gongs, one blow four times, thus : 1-1-1-1, hearing which the several apparatus on the way to the fire will return to their quarters.

CHELSEA ALARMS.

The call *upon* Chelsea will be given by striking upon the Charlestown and East Boston circuits the box number 198, *four* rounds.

The call *from* Chelsea upon this department will be given by striking upon all the circuits of the city the box number 198, *three* rounds ; the same for 1st, 2d, and 3d alarms.

DEER ISLAND.

189 struck three times on the East Boston circuit and the Fire-Boat gong.

SCHOOL SIGNAL.

22 struck three times on all the bells.

POLICE CALL.

Eleven blows struck three times on all the bells.

SPECIAL REGULATIONS.

Members of companies of the "Call Force" shall report at the houses of their respective companies, and remain there

twenty minutes, whenever second alarms are sounded from boxes to which their companies would respond on third alarms.

Members of the several companies of the department, call as well as permanent, must remain in their respective districts when a fire is in progress in any other district, unless the apparatus to which they are attached is called thither. The necessity for this requirement must be evident in view of the possibility of two or more fires occurring at the same time in different parts of the city.

There are 277 Signal Stations or Boxes, and the accompanying "*Running Card*" shows the location of each Box, and also the companies responding to 1st, 2d, and 3d alarms from the several boxes.

COMPANIES RUNNING TO EACH BOX.

RECAPITULATION.

There are 277 fire-alarm boxes, divided as follows, viz. : —

Boston	85
South Boston	26
East Boston	24
Roxbury	41
Dorchester	34
Charlestown	30
West Roxbury	21
Brighton	15
Chelsea	1
	<hr/>
	277

The following boxes are private property : 68 duplicate, 198, 631, 612, 442.

STOCK AND FIXTURES.

Magnetic Fire-Alarm Apparatus, the whole cost of which is about \$100,000. Working Lines of Wire about 250 miles; Signal Boxes in use, 277; Striking Machines, 53, and one not in use; Gongs, 96; Tappers, 57; Vibrators, 23; Clocks: one electric watch clock; two repeating three-dial clocks for striking signals; Magneto-Electric Machine, for striking bells, 1, loaned to Tufts College; Relay Magnets, 15; Ten Pen Register, 1; Office Bells, 17; Telegraph Keys, 16; Dial Instruments, 16; 12 Sounders and Keys in charge of District Engineers, with local batteries; two writing instruments for office use; 1 switch board; 1 large galvanometer; 15 small do., for signal batteries; 2 portable rheotropes; 1 chronometer; 1 set telegraphic apparatus in Superintendent's house; 1 set instruments in Assistant Superintendent's house; 4 sets telegraphic apparatus in assistants' houses; 1 repeating instrument from West Roxbury, and 1 from Charlestown; 1 small switch-board from Charlestown; 925 battery-cups in use; 45 spare battery-cups; 300 lbs. sulphate of copper; 1,675 lbs. zinc; 75 battery-coppers; 175 lbs. sulphate of zinc; brackets, wire, insulators, etc., office furniture, bedsteads, bedding, and sundry other articles.

ALARM BELLS.

The Fire-Alarm Telegraph is connected with the following bells : —

Adams School-house, Sumner Street, East Boston, steel, 2,995 lbs., owned by city.

- Andrew School-house, Dorchester street, Washington Village, steel, 2,995 lbs., owned by city.
- Berkeley-street Church, composition, 2,538 lbs.
- Bowdoin-square Church, composition, 3,882 lbs.
- Boylston Market, corner Washington and Boylston streets, composition, 529 lbs., owned by city.
- Boylston School-house, Washington, near Dover street, composition, 818 lbs., owned by city.
- Bunker Hill School-house, Charlestown, 2,009 lbs., owned by city.
- Castle-street Church, corner Washington and Motte streets, composition, 1,760 lbs., owned by city.
- Chapman School-house, Eutaw street, East Boston, steel, 3,109½ lbs., owned by city.
- Charles-street Church, composition, 1,883 lbs.
- Chemical Engine House, No. 4, West Roxbury, owned by city, weight 400 lbs.
- Chemical Engine House No. 5, West Roxbury.
- Chemical Engine House No. 6, Allston, composition, about 400 lbs., owned by city.
- Chemical Engine House No. 7, West Roxbury, owned by city, weight 300 lbs.
- City Hall, Charlestown, composition, 3,600 lbs., owned by city.
- Dean School-house, Wall street, composition, 712 lbs., owned by city.
- Engine House No. 28, Centre street, West Roxbury, composition, owned by city, weight 4,000 lbs.
- Engine House No. 1, Dorchester street, South Boston, composition, 2,911 lbs., owned by city.
- Engine House No. 11, Orleans street, East Boston, composition, 817 lbs., owned by city.
- Engine House No. 12, Dudley street, Boston Highlands, composition, 3,509 lbs., owned by city.
- Engine House No. 16, Temple street, Dorchester, composition, 4,149 lbs., owned by city.
- Engine House No. 17, Meeting-house Hill, Dorchester, composition, 4,000 lbs., owned by city.
- Engine House No. 18, Harvard street, Dorchester, composition, 3,184 lbs., owned by city.
- Engine House No. 19, Mattapan, Dorchester, composition, 2,927 lbs., owned by city.
- Engine House No. 20, Walnut street, Dorchester, composition, 3,061 lbs., owned by city.
- Engine House No. 21, Boston street, Dorchester, composition, 3,026 lbs., owned by city.
- Engine House No. 29, Brighton, steel, 1,535 lbs., owned by city.

- Everett School-house, Northampton street, composition, 1,501 lbs., owned by city.
- Faneuil Hall, steel, 5,816 lbs., owned by city.
- Franklin-place School-house, corner Tremont and Franklin place, Boston Highlands, composition, 2,958 lbs., owned by city.
- Fire Department repair-shop, corner Harrison avenue and Wareham street, steel, 1,000 lbs., owned by city.
- George-street School-house, Boston Highlands, composition, 4,160 lbs., owned by city.
- Hancock School-house, Parmenter street, composition, 4,090 lbs., owned by city.
- Hollis-street Church, composition, 1,800 lbs.
- Hose House No. 12, South Boston, composition, 800 lbs., owned by city.
- Lawrence School-house, B street, South Boston, steel, 3,400 lbs., owned by city.
- Lewis School-house, Dale street, Boston Highlands, composition, 3,104 lbs., owned by city.
- Lincoln School-house, Broadway, South Boston, composition, 3,110 lbs., owned by city.
- Maverick-street Church, East Boston, composition, 2,000 lbs.
- Princeton-street School-house, East Boston, composition, 2,470 lbs., owned by city.
- Quincy School-house, Tyler street, composition, 2,941 lbs., owned by city.
- Rice School-house, Appleton street, composition, 3,042 lbs., owned by city.
- Rubber Factory, Charlestown, composition, 999 lbs., owned by city.
- Saratoga-street M. E. Church, East Boston, steel, 1,968 lbs., owned by city.
- Sharp School-house, Anderson, corner Pinckney street, composition, 900 lbs., owned by city.

SHELF No.

[April, 1880, 10,000]

BOSTON PUBLIC LIBRARY.

One volume allowed at a time, and obtained only by card; to be kept 14 days (or seven days in the case of fiction and juvenile books, published within one year,) without fine; not to be renewed; to be reclaimed by messenger after 21 days, who will collect 20 cents, beside fine of 2 cents a day, including Sundays and holidays; not to be lent out of the borrower's household, and not to be transferred; to be returned at this Hall.

Borrowers finding this book mutilated or unwarrantably defaced, are expected to report it; and also any undue delay in the delivery of books.

* * No claim can be established because of the failure of any notice, to or from the Library, through the mail. •

The record below must not be made or altered by borrower.

[illegible]
